

Z. Gronostajski, F. Grosman, K. Jaskiewicz

Development of research methods and equipment for determining susceptibility of materials to change in deformation path

[Abstract](#) [Full Text PDF](#)

H. Dybiec

Plastic consolidation of metallic powders

[Abstract](#) [Full Text PDF](#)

A. Neimitz

Fracture toughness of materials at the presence of plastic deformation

[Abstract](#) [Full Text PDF](#)

K. Kowalczyk-Gajewska, Z. Mróz, R. B. Pecherski

Micromechanical modelling of polycrystalline materials under non-proportional deformation paths

[Abstract](#) [Full Text PDF](#)

M. S. Szczerba, T. Tokarski, M. Perek

<100> burgers vector dislocations inherited by second overshoot fcc twinning

[Abstract](#) [Full Text PDF](#)

H. Paul

Deformation and recrystallization mechanisms of low stacking fault energy metals

[Abstract](#) [Full Text PDF](#)

Z. Nowak, P. Perzyna, R. B. Pecherski

Description of viscoplastic flow accounting for shear banding

[Abstract](#) [Full Text PDF](#)

M. Stefanska-Kadziela, J. Majta, S. Dymek, K. Muszka

Effect of high strain rate on the dislocation structure of microalloyed and if steels

[Abstract](#) [Full Text PDF](#)

M. Gromada, G. Mishuris, A. Ochsner

Necking in the tensile test. Correction formulae and related error estimation

[Abstract](#) [Full Text PDF](#)

J. Talar

Data mining methods - application in metallurgy

[Abstract](#) [Full Text PDF](#)

W. Oliferuk, M. Maj

Energy storage rate and plastic instability

[Abstract](#) [Full Text PDF](#)

J. Gawad, M. Pietrzyk

Application of cafe multiscale model to description of microstructure development during dynamic recrystallization

[Abstract](#) [Full Text PDF](#)

J. Czaja, R. Sliwa

Modelling of screw joints with its experimental verification

[Abstract](#) [Full Text PDF](#)

A. Bokota, T. Domanski

Numerical analysis of thermo-mechanical phenomena of hardening process of elements made of carbon steel C80U

[Abstract](#) [Full Text PDF](#)

Z. Pater, A. Tofil

Experimental and theoretical analysis of the cross - wedge rolling process in cold forming conditions

[Abstract](#) [Full Text PDF](#)

M. Kopernik, M. Pietrzkyk

2d numerical simulation of elasto-plastic deformation of thin hard coating systems in deep nanoindentation test with sharp indenter

[Abstract](#) [Full Text PDF](#)

T. Balawender

Sequential upsetting

[Abstract](#) [Full Text PDF](#)

P. Józwik, Z. Bojar

Analysis of grain size effect on tensile properties of ni3al - based intermetallic strips

[Abstract](#) [Full Text PDF](#)

P. Skubisz, J. Sinczak

Precision forging of thin-walled parts of az31 magnesium alloy

[Abstract](#) [Full Text PDF](#)

A. Bokota, A. Kulawik

Model and numerical analysis of hardening process phenomena for medium-carbon steel

[Abstract](#) [Full Text PDF](#)

R. Łyszkowski, J. Bystrzycki

Influence of temperature and strain rate on the microstructure and flow stress of iron aluminides

[Abstract](#)   [Full Text PDF](#)

J. Michalczyk, V. Devyatov

The effect of strain intensification on the single-operation process of extrusion of deep-bottomed sleeves

[Abstract](#)   [Full Text PDF](#)

K. Karczewski, S. Józwiak, Z. Bojar

Mechanisms of strength properties anomaly of Fe-Al sintered by compression tests at elevated temperature

[Abstract](#)   [Full Text PDF](#)
